Melih Sahin

Graduate Software Engineer @ Deloitte | Tax, Technology & Engineering, App Development
Kingston Upon Thames, England, United Kingdom

Summary

A recent graduate from Queen Mary University of London with a Bachelor of Science in Computer Science and Mathematics, currently contributing as a Developer at Sprift. Skilled in front-end development, web development, and utilizing technologies such as JavaScript and PHP to build scalable UI components and API endpoints on AWS serverless infrastructure. Passionate about improving codebases, reducing technical debt, and enhancing scalability, while collaborating with cross-functional teams in an agile environment. Committed to delivering innovative solutions tailored to the needs of property professionals, leveraging a strong foundation in computer science and mathematics.

Experience

Deloitte
Graduate Software Engineer
September 2026 - Present (2 months)
London

Sprift - Know any property instantly
Developer
February 2026 - August 2026 (7 months)
London

• Develop and ship frontend and backend features for a property data platform serving over 30 million UK residential properties, used daily by thousands of property professionals.
• Build UI components, interactive property reports and API endpoints using JavaScript and PHP on an AWS serverless infrastructure.
• Refactor and improve existing codebases to reduce technical debt, improve readability and support long-term scalability.
• Collaborate within an agile team using Jira and Confluence, working closely with senior developers and the CTO through daily stand-ups and code reviews.

BALANS INTERNATIONAL LTD

Onsite Manager

August 2025 - September 2025 (2 months)

London

Managed end-to-end logistics for a domestic flat redevelopment in Victoria, including coordinating equipment and furniture deliveries, organising provisions for the team, maintaining health and safety standards on site, and liaising with residents to minimise disruption.

Queen Mary University of London

1 year 10 months

Course Representative

September 2023 - June 2025 (1 year 10 months)

London Area, United Kingdom

• Elected by peers for two consecutive academic years to represent 60+ Computer Science and Mathematics students in discussions with faculty and university administration.
• Investigated, evaluated, and resolved course-related issues by conducting student surveys, analyzing impact, and proposing data-driven solutions to teaching staff.
• Successfully advocated for curriculum improvements, resolving cohort dissatisfaction through direct communication with professors and persistent follow-up on action items.
• Bridged the gap between student concerns and institutional change, demonstrating leadership, negotiation skills, and ability to drive results in complex organizational environments.

Student Ambassador

September 2024 - May 2025 (9 months)

London Area, United Kingdom

• Represented Queen Mary University at on-campus recruitment events, open days, and prospective student visits, serving as a key touchpoint for families making university decisions.
• Delivered tailored guidance based on personal academic journey through Computer Science and Mathematics, helping prospective students understand course structure, career outcomes, and university culture.
• Strengthened communication and presentation skills by engaging with diverse audiences, from international students to concerned parents, while maintaining professional representation of the university.

• Contributed to positive enrollment outcomes by providing authentic insights that helped prospective students make informed choices about their educational future.

Laboratory Demonstrator
September 2024 - January 2025 (5 months)
London Area, United Kingdom

• Selected for outstanding academic performance, in Algorithms and Data Structures module (92.4%), to guide second-year Computer Science students through advanced algorithmic concepts including sorting algorithms, search trees, graph algorithms, and complexity analysis.
• Supervised and evaluated 20+ students during weekly 2-hour practical coding sessions, balancing efficiency with accuracy to maintain grading integrity across a large cohort.
• Clarified complex technical concepts through one-on-one mentoring and group demonstrations, earning positive feedback for ability to make challenging topics accessible and engaging.
• Developed teaching adaptability by recognizing different learning styles and adjusting explanations to ensure every student could grasp fundamental data structures and algorithmic thinking.

Laboratory Demonstrator
September 2023 - December 2023 (4 months)
London Area, United Kingdom

• Supervised and mentored 10 first-year Computer Science students through weekly programming assignments and a semester-long mini-project, selected as one of few second-year students for this teaching role.
• Assessed and provided constructive feedback on code quality, algorithmic efficiency, and programming best practices, helping students develop strong foundations in procedural programming.
• Adapted teaching approaches to accommodate different attitudes toward work and learning styles, learning how to motivate students with varying levels of engagement and background.
• Gained valuable insights into education methodologies and the challenges of helping students progress from novice to competent programmers.

Globant
Software Engineer Intern
June 2024 - August 2024 (3 months)
London Area, United Kingdom

• Led a 3-person team, delivering a production-ready prototype that showcased how AI can accelerate client-facing processes.
• Architected and delivered a multi-agent AI workflow proof of concept that automated meeting-to-PowerPoint conversion, transforming hours of manual work into single-click documentation for discovery phases.
• Conducted deep-dive research on enterprise AI frameworks (AutoGen, LangChain), creating prototypes in AutoGen Studio 2.0 and Langflow that evaluated library capabilities and informed technical architecture decisions.
• Extended the python-pptx library with custom functionality to generate presentations matching corporate brand guidelines, demonstrating ability to adapt existing tools to business requirements.

Education

Queen Mary University of London

Bachelor of Science - BS, Computer Science and Mathematics · (September 2022 - July 2025)

Zero To Mastery Academy

Computer Programming/Programmer, General · (February 2023 - January 2024)

The Kingston Academy

A level, Further Mathematics, Mathematics, Physics, Computer Science · (2020 - 2022)
